A Guest lecture on “**Ethereum-Block Chain Technology**” has been organized by the Department of Computer Science and Engineering, Avanathi Institute of Engineering and Technology, cherukupally on 18/11/2023. Mr.Y.Surya Prakash, Assistant Professor , Computer Science and Engineering, MVGR College of Engineering (A) has explained the students about Ethereum-Block Chain Technology. Blockchain technology is an advanced database mechanism that allows transparent information sharing within a business network. A blockchain database stores data in blocks that are linked together in a chain. The data is chronologically consistent because you cannot delete or modify the chain without consensus from the network. As a result, you can use blockchain technology to create an unalterable or immutable ledger for tracking orders, payments, accounts, and other transactions. The system has built-in mechanisms that prevent unauthorized transaction entries and create consistency in the shared view of these transactions.
